

SEIKI WORKSHOPS KIMURA SHIATSU INSTITUTE 2018

Seiki soho is a manual method developed by Kishi Akinobu sensei and is not easy to describe : the experience is essential and all definitions will disturb this experience. It is the intuitive way of 'Doing by not doing'. It is the art of waiting, looking without looking, observing, diagnosis without questions or Fu Mon Shin... Seiki technique is not fixed but based upon experience, intuition, feeling and sensitivity. This way the right actions will emerge at the right moment (Kidoma) or as Kishi sensei once said: "My technique is no technique".

“Hand,

Soft and warm when touching
Spreading and reaching to every level and space
Knowing where it has to touch
No doubt, no hesitation
Soothing, heart-centered fullness
Brings a feeling of cradling
It lets ki from heaven pass through you
Drawing out disharmony
Reborn through touch.” A.Kishi

GYOO KI

In Seiki practice Gyooki, Ki exercise or 'breathing through the hands' is essential. One should not send energy or Ki and there is no manipulation needed, no stimulation nor sedation! Through Gyooki we naturally exchange Yuki or Waki and spontaneously life force starts to move again, enhancing the metabolism and promoting healing and regenerating processes in people.
